

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1.-24. (Cancelled)

25. (New) A thermoplastic composition comprising a mixture of a polyamide and/or polyester matrix with at least:

(i) a first additive of formula $R-Z_u$, in which:

R is a hydrocarbon radical optionally comprising one or more heteroatoms,

u is an integer greater than or equal to 1,

and

Z is an acid, amine or alcohol functional group; and

(ii) a second additive selected from the group consisting of:

(A) an additive obtained by the reaction between at least:

a) one multifunctional compound of formula (I):

b) one multifunctional compound of formula (III):

c) optionally, one bifunctional monomer of formula (II) or the corresponding cyclic form

(B) one additive obtained by the reaction between at least:

a) one monofunctional compound of formula (III):

- b) one branching compound of formula (IV):

- c) optionally, one multifunctional compound of formula (I):

- d) optionally, one bifunctional monomer of formula (II) or the corresponding cyclic form

in which:

R^1 , R^2 , R^3 and/or R^4 represent, independently of each other, a hydrocarbon radical optionally comprising one or more heteroatoms;

X and Y are antagonist reactive functional groups capable of reacting with each other to form an amide bond;

\underline{n} is an integer ranging from 3 to 50;

\underline{m} is an integer ranging from 2 to 10; and with the proviso that

R , R^1 , R^2 , R^3 and R^4 do not comprise an amine, acid or alcohol functional group capable of forming an amide and/or ester bond.

26. (New) The thermoplastic composition as defined by Claim 25, comprising from 0.01 to 5% by weight of the first additive (i) relative to the total weight of the composition.

27. (New) The thermoplastic composition as defined by Claim 25, comprising from 0.01 to 20% by weight of the second additive (ii) relative to the total weight of the composition.

28. (New) The thermoplastic composition as defined by Claim 25, wherein the radical R of the first additive (i) is a linear or branched, saturated or unsaturated, aliphatic, cyclic and/or aromatic hydrocarbon radical which may optionally comprise one or more heteroatoms, said radical R having from 2 to 100 carbon atoms.

29. (New) The thermoplastic composition as defined by Claim 25, wherein the first additive (i) is selected from the group consisting of isophthalic acid, terephthalic acid, adipic acid, trimesic acid, 2,2,6,6-tetrakis (β -carboxyethyl)cyclohexanone, diaminopropane-N,N,N',N'-tetraacetic acid, nitrilotrialkylamines, trialkylenetetraamines, tetraalkylenepentaamines, 4-aminoethyl-1,8-octanediamine, 3,5,3',5'-biphenyltetracarboxylic acid, acid derivatives of phthalocyanine and naphthalocyanine, 1,3,5,7- naphthalenetetracarboxylic acid, 2,4,6-pyridinetricarboxylic acid, 3,5,3',5'- bipyridyltetracarboxylic acid, 3,5,3',5'-benzophenonetetracarboxylic acid, 1,3,6,8-acridinetetracarboxylic acid, 1,2,4,5-benzenetetracarboxylic acid, 1,3,5-triazines, 1,4-diazines, melamine, compounds derived from 2,3,5,6-tetraethylpiperazine, 1,4-piperazines, tetrathiafulvalenes, 2,4,6-tri(aminocaproic acid)-1,3,5-triazine (TACT), dodecylamine, octadecylamine, piperidine, benzylamine, aniline, hexanoic acid, palmitic acid, stearic acid, oleic acid, benzoic acid, behenic acid, polyalkylene oxides comprising at least one amine or acid functional group, glycol, trimethylolpropane, glycerol, pentaerythritol, sorbitol, mannitol, monosaccharides, and/or a mixture thereof.

30. (New) The thermoplastic composition as defined by Claim 25, wherein Y is an amine functional group when X represents a carboxylic acid functional group, or Y is a carboxylic acid functional group when X represents an amine functional group.

31. (New) The thermoplastic composition as defined by Claim 25, wherein the radicals R¹, R², R³ and/or R⁴ of the second additive (ii) represent, independently of each other, a linear or branched, saturated or unsaturated, aliphatic, cyclic and/or

aromatic hydrocarbon radical which may optionally comprise one or more heteroatoms, said radicals R¹, R², R³ and/or R⁴ having from 2 to 100 carbon atoms.

32. (New) The thermoplastic composition as defined by Claim 25, wherein the multifunctional compound of formula (I) is selected from the group consisting of 2,2,6,6-tetrakis(β -carboxyethyl)cyclohexanone, diaminopropane-N,N,N',N'-tetraacetic acid, nitrilotrialkylamines, trialkylenetetraamines and tetraalkylenepentaamines, 4-aminoethyl-1,8-octanediamine, 3,5,3',5'-biphenyltetracarboxylic acid, the acid derivatives of phthalocyanine and naphthalocyanine, 1,3,5,7-naphthalenetetracarboxylic acid, 2,4,6-pyridinetricarboxylic acid, 3,5,3',5'-bipyridyltetracarboxylic acid, 3,5,3',5'-benzophenonetetracarboxylic acid, 1,3,6,8-acridine tetracarboxylic acid, trimesic acid, 1,2,4,5-benzenetetracarboxylic acid, 1,3,5-triazines, 1,4-diazines, melamine, the compounds derived from 2,3,5,6-tetraethylpiperazine, 1,4-piperazines, tetrathiafulvalenes, 2,4,6-tri(aminocaproic acid)-1,3,5-triazine (TACT), polyalkylene oxides containing at least three acid or amine functional groups, and/or mixtures thereof.

33. (New) The thermoplastic composition as defined by Claim 25, wherein the bifunctional compound of general formula (II) is selected from the group consisting of ϵ -caprolactam and/or the corresponding amino acid: aminocaproic acid, para- or meta- aminobenzoic acid, 11-aminoundecanoic acid, lauryllactam and/or the corresponding amino acid, 12-aminododecanoic acid, caprolactone, 6-hydroxyhexanoic acid, and oligomers and/or mixtures thereof,

34. (New) The thermoplastic composition as defined by Claim 25, wherein the monofunctional compound of general formula (III) is selected from the group consisting of an aliphatic monoacid or monoamine compound, an aromatic monoamine or monoacid compound, an organophosphorus monoamine or monocarboxylic acid compound, an organosulfo monoamine or monocarboxylic acid

compound, a quaternary ammonium monoamine or monocarboxylic acid compound and/or mixtures thereof.

35. (New) The thermoplastic composition as defined by Claim 25, wherein the monofunctional compound of general formula (III) is selected from the group consisting of n-hexadecylamine, n-octadecylamine, n-dodecylamine, benzylamine, aminomethylphosphonic acid, sulfanilic acid, sulfobenzoic acid, betaine, and/or mixtures thereof.

36. (New) The thermoplastic composition as defined by Claim 25, wherein the branching compound of formula (IV) is selected from the group consisting of 5-aminoisophthalic acid, 6-aminoundecandioic acid, 3-aminopimelic diacid, aspartic acid, 3,5-diaminobenzoic acid, 3,4-diaminobenzoic acid, lysine and/or mixtures thereof.

37. (New) The thermoplastic composition as defined by Claim 25, wherein the additive (ii) (A) is a functionalized star-shaped polyamide obtained by the reaction of at least: one multifunctional compound of formula (I), one bifunctional monomer of formula (II) or the corresponding cyclic form thereof, and one monofunctional compound of formula (III).

38. (New) The thermoplastic composition as defined by Claim 25, wherein the additive (ii) (B) is a functionalized hyperbranched polyamide obtained by the reaction of at least: optionally, one multifunctional compound of formula (I), one bifunctional monomer of formula (II) or the corresponding cyclic form thereof, one monofunctional compound of formula (III), and one branching compound of formula (IV).

39. (New) The thermoplastic composition as defined by Claim 25, wherein the additive (ii) (A) is obtained by the reaction between a multifunctional compound of

formula (I) in proportions of from 1 to 30% by weight, a monofunctional compound of formula (III) in proportions of from 5 to 60% by weight, and, optionally, a bifunctional monomer of formula (II) in proportions of from 0 to 95% by weight.

40. (New) The thermoplastic composition as defined by Claim 25, wherein the additive (ii) (B) is obtained by the reaction between a monofunctional compound of formula (III) in proportions of from 20 to 70% by weight, a branching compound of formula (IV) in proportions of from 10 to 50% by weight, optionally, a multifunctional compound of formula (I) in proportions of from 0 to 10% by weight and, optionally, a bifunctional monomer of formula (II) in proportions of from 0 to 50% by weight.

41. (New) The thermoplastic composition as defined by Claim 25, wherein the content of terminal acid and amine groups of the second additive (ii) ranges from 0 to 300 meq/kg.

42. (New) The thermoplastic composition as defined by Claim 25, comprising a polyamide matrix of a (co)polyamide selected from the group consisting of polyamide 6, polyamide 6,6, polyamide 4, polyamide 11, polyamide 12, polyamides 4-6, 6-10, 6-12, 6-36, 12-12, and copolymers and mixtures thereof.

43. (New) The thermoplastic composition as defined by Claim 25, comprising reinforcing or bulk fillers.

44. (New) The thermoplastic composition as defined by Claim 43, comprising reinforcing glass fibers.

- 45. (New) A process for the preparation of a thermoplastic composition as defined by Claim 25, comprising mixing at least the first additive (i) and the second additive (ii) with the polyamide and/or polyester matrix.

- 46. (New) A process for the shaping of an article by forming a thermoplastic composition as defined by Claim 25, comprising the extrusion, molding, injection or drawing thereof.

- 47. (New) A shaped article formed from the thermoplastic composition as defined by Claim 25.
